Introduction

“Medical Korea Academy-Global” is a training program provided by the Korea Health Industry Development Institute(KHIDI), where the Institute invites medical practitioners from various countries to participate. This program is to provide the trainees with an opportunity to learn about Korea’s advanced medical knowledge and technology, as well as improve their understanding of, and preference for, Korean medical services. We look forward to the participation and support of medical practitioners (outside Korea) who are interested in the program.
